

# SI Precast now offers light pole bases.

## Advantages:

### ➤ Superior Strength & Durability

Precast light pole bases gradually gain strength over time, while other materials can deteriorate and gradually lose strength.

### ➤ Quality

Precast light pole bases are produced in a controlled plant environment, which allows for a higher quality and uniformity.

### ➤ Availability

Precast light pole bases can be produced in advance and stored at the plant to ensure they are available when needed at the jobsite.

### ➤ Reduced Construction Time

Precast light pole bases increase efficiency because weather will not delay production and allow the bases to be installed year round.

THE source for all your  
precast needs!!
